Gaming

Shooter FPS RTS WWII

REFERENCES

The last couple of years I've worked together with Roel. We worked for different companies under the same umbrella but often needed each other's help. I found it very pleasant to work with Roel and could always count on a quick and neat solution for any challenges we had.

— Edwin Timmermans, Warehouse supervisor for DHL Supply Chain at Philip Morris International

Roel always showed a high degree of professionalism during the period we have worked together, he has a strong customer mind combined with pragmatical approach on solving complex ICT issues in both office and factory environments. He has been a reliable resource to deliver high standard service. I strongly believe he is an added value to any organization.

— Kenneth Tobback, Teamlead on-site support for Econocom at Philip Morris International

I got to know Roel as a true professional, but also a nice person to work with. His knowledge is at a high level, but most importantly he really understands and supports the internal customer! He is the ideal linking pin between user and IT department!

— Clemens Michael, Supervisor Logistics & Warehousing at Philip Morris International

Despite the short period we worked together, it was quickly apparent that Roel is a good teamplayer you can count on 100%. He doesn't run away from problems but goes out of his way to solve them.

— Talitha den Butter, Support Engineer at OfficeGrip B.V.
